

# Scheduling

Intelligent Schedules, Optimize Teams, Reduce Costs

Instantly increase profits by 7%+ with visibility to locations, food costs, labor costs, scheduling and accounting

Leverage Smart Scheduling with automated schedule intelligence

Reduce labor costs with rule-based labor and food category relationships

Centralize employee resource management across the enterprise with shared employees

## Smart Scheduling Templates

Smart Scheduling templates minimize labor costs by correlating sales ranges to the optimum number of scheduled team members in each position.

## Reduce Costs with Automated Scheduling

Manage shifts by defining the rules and relationships between time-of-day, job codes, skills, tasks, and menu items that drive schedules, training, skill certifications and task assignments. Configure the current schedule to match historic average, last week's schedule, or optimal scheduling.

*"You just showed me what I spent 20 years trying to build and you are delivering it at a fraction of what I have spent (trying)."*

## Menu Profit Scheduling

Scheduling by menu identifies which items sell best, who's required to prep, produce, and serve them to maximize profits. Linking those menu items with associated job codes, guarantees schedules always have the right people on staff, at the right time.

## Time Saving Intelligent Schedules

Intelligent scheduling maximizes job productivity with easy access to schedules 24x7 from any mobile device or browser.

## Share Employees

Manage and share employees across restaurant locations and across different job codes. Track overtime and other state and local regulatory requirements as well as productivity across multiple locations.
